Subject: Letter of Appreciation for High-Performance Rooftop Waterproofing Material

Dear Sir/Madam,

I am writing on behalf of Dharni Sankalp Constructions to formally express our sincere appreciation and satisfaction with the outstanding performance of the Tri Polarcon rooftop waterproofing material used in our recent terrace project in Hyderabad.

Rooftop waterproofing presents unique structural challenges, including extreme weather exposure, thermal expansion, and standing water. Your specialized coating system has proven to be an exceptional solution for our engineering and construction requirements. The material applied seamlessly, cured into a robust elastomeric membrane, and successfully bridged all surface hairline cracks.

Following recent heavy seasonal rains, the treated rooftop has remained completely leak-free, demonstrating the excellent hydrostatic water resistance and durability of your product. As a firm committed to delivering premium construction standards, using your high-grade construction chemicals has provided our building projects with long-term structural protection and complete peace of mind for our clients.

Thank you for engineering top-tier waterproofing products and maintaining high industrial standards. We look forward to choosing Tri Polarcon Pvt. Ltd. as our trusted brand for all our future construction chemical and coating requirements.

Yours sincerely,

S. RANJITH KUMAR

Director
